Software engineer with professional experience in Java ERP development and rail data services. I work on automatic document processing, bug fixes and maintenance at Abacus Research. Outside work, I build and operate self-hosted applications, from multi-user music statistics to network monitoring.

EXPERIENCE

Software Engineer · Abacus Research AG

Sep 2019–present · Wittenbach SG, Switzerland

- Debitoren/Kreditoren Belege Prozess team: develop automatic document processing, new applications and features; investigate and fix bugs.
- Work with other teams to integrate features between our applications and other products. Maintain existing applications. Java, Vaadin.

Software Developer · Stadler

Oct 2018–Aug 2019 · Bussnang, Switzerland

- Developed and maintained RDS (Rail Data Services) in a small team.
- Built an Angular frontend to manage VPN certificates for communication between trains and RDS. Java, JavaScript, Angular.

Tutor · FH Vorarlberg / Code Base Camp

Nov 2017–Feb 2018; Aug 2018 · Dornbirn, Austria

- Supported programming beginners in Module 3 (2017–2018) and Module 1 (August 2018).

Software Engineering Intern · Stadler Altenrhein AG

Jul–Sep 2015; Jul–Sep 2016; Jan–Feb & Jun–Sep 2017; Jan–Feb 2018 · Altenrhein, Switzerland

- Built C# and SQL tooling, including MindManager and Outlook plug-ins for shared project data and task access.
- Automated meeting and change-request administration, customer communication and Excel workflows around Projectplace.
- Extended data analysis and customizable charts; fixed bugs and optimized existing code.

Intern · Etiketten CARINI GmbH

Jul–Sep 2014 · Lustenau, Austria

- Our team diploma project (Aug 2014–Feb 2015) included this internship: carried out most of the technical design and implementation of a SharePoint quality-management intranet and wrote nearly all technical thesis sections.

EARLIER EXPERIENCE

Stadler Altenrhein AG · technical internships, Aug 2011 and Aug–Sep 2013: specifications, reports, calculations and product data. Böhler+sohn · CAD internship, Jul–Aug 2012. Lebenshilfe Vorarlberg · civil service, Sep 2015–May 2016.

Software Engineer

SELECTED PROJECTS

SpotifyStatsTracker

Complete application rewrite after starting as a fork: multiple users with separate histories and optional sharing; optional Spotify Connect push updates with polling fallback; Spotify API backfill for available missed plays; Last.fm genre and biography data. Python, Flask, SQLite, JavaScript.

MySpeed

Substantially extended fork: added iperf3, configurable targets tested in sequence, target comparisons, redesigned statistics, new color palettes and additional languages. React, JavaScript, Express, Bun, SQLite.

Tutto

Browser dice-and-card game for local and online play, with synchronized rooms, computer opponents and an optional strategy coach based on game calculations. TypeScript, React, Socket.IO, SQLite.

timo.rzipas.win

Bilingual Astro site with static builds, nginx language selection, Docker delivery through GitHub Actions and self-hosting through Cloudflare Tunnel.

EDUCATION

2016–2018 · FH Vorarlberg

Bachelor of Science in Engineering (BSc) — Computer Science: Software and Information Engineering.

2010–2015 · HTL Dornbirn

Industrial engineering, specializing in business informatics (Matura).

SKILLS

Professional: Java, Vaadin; JavaScript, Angular; C#, SQL, SharePoint.
Personal projects: TypeScript, React, Python, Flask, SQLite, Socket.IO, Astro.
Operations: Docker, Linux, nginx, Git, GitHub Actions, networking, monitoring.

CERTIFICATES & LANGUAGES

pm basic — project management certificate, Projekt Management Austria / OCG, 4 Jun 2014.
Cisco Networking Academy — Routing and Switching Essentials, course completed at HTL Dornbirn, 19 Feb 2015.
Languages: German — native; English — C1, Cambridge CAE (2014).
